Environment Conservation Policy

ENVIRONMENT CONSERVATION POLICY 2017-18.

Part I

PREAMBLE

Dr. Ambedkar Institute of Management and Research acknowledges the environmental impact of its operations and activities necessary to carry out its responsibility as an educational body. The institute is committed to mitigate the impact resulting from its operations.

DAIMSR pledges to comply with the environmental legislations and imbibe environmental sensitivity and responsibility in its students, teaching and non-teaching staff, stakeholders, and the surrounding members of society. It also commits to include environmental consciousness in the decision-making at all levels and encourage measures and initiatives towards maintaining a green campus, landscaping, waste management, water conservation, and recycling

Part II

Message by the IQAC Coordinator

DAIMSR has always focused on setting performance benchmarks through its students and stakeholders. The Environment Policy 2017 is in line with this vision and outlines our commitment to act decisively on various environmental issues. In this regard, we focus on mitigating our contribution to climate change by reducing the Institute's waste output and improving the site's biodiversity.

Awareness and concern for the environment are mandatory for next-generation business innovation especially while designing solutions. Environment is the basis of life and Institute understands the importance of its alignment with academics. Therefore, it becomes vital that we establish an education system that places environmental considerations at its heart through academics and co-curricular activities.

This vision facilitated the establishment of environmental objectives and the proposed **Environment Club**. The guidelines and measures outlined under the club will enable us to act proactively to address environmental concerns and groom students into future citizens of environmental sensitivity and sustainability.

Part -III

Statement of Policy

The policy of DAIMSR is to conserve natural environment, design and develop sustainable and innovative practices, promote energy conservation and contribute to a greener ecosystem through its educational system and curriculum.

Part -IV

POLICY OBJECTIVES

1. To analyze the environmental issues arising from Institute's operations and minimizing their impact through planning in advance and implementation of innovative technologies and measures.
2. To review the 'Environmental Policy' annually to take into account best practices and implement changes as per Institutional requirements and Governmental legislations.
3. To ensure that the environmental policy is implemented and supported at all levels of the Institute.
4. To facilitate a conservation-oriented mind-set and attitude in harmony with nature, amongst all its stakeholders.
5. To bring students to the forefront of planning, designing, and implementing various environmental measures and initiatives.
6. To ensure the awareness of practices, technologies, and measures in the adjoining rural areas for inclusive and collective growth.
7. To adopt an ethical environment-friendly approach at all levels of the Institute.
8. To promote innovation and startup for sustainable development.

Part –V

Guiding practices and measures

IQAC is proposing the constitution of **Environmental club** that will carry out initiatives and measures for the achievement of aforementioned objectives:

1. By creating awareness and encouraging participation in environmental initiatives amongst its students and employees.
2. By encouraging optimum utilization of degradable and non-degradable resources, minimum waste generation, proactive waste management, and an efficient garbage disposal system in compost-pit.
3. By promoting practices and operations pertaining to recycling, upcycling, and conservation of resources.
4. By providing healthy food in canteen.
5. By organizing rural development programs and providing them with resources and support.
6. By efficient usage of water and energy and reducing the use of plastic and other such resources to the bare minimum exigencies.
7. By taking up projects and initiatives on restoring the ecosystem through tree plantations, landscaping, rainwater harvesting, water conservation and recycling, waste management, and use of efficient sources of energy.
8. By developing collaborations in the form of MoUs with other institutes, and professional and government bodies for auditing and maintenance purposes.
9. By mentioning the activities and initiatives undertaken in the Annual report and institutional website.

Part –VI

Inclusion in Curriculum

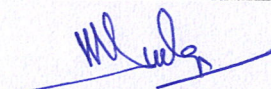

1. Through subjects that promote environmental and conservation awareness in students.
2. Through Student Induction Program.
3. Through Faculty-student mentoring sessions.
4. Through student inclusion in committees and participation in all the initiatives and programs curated for this purpose.
5. Through organizing collaborative guest lectures of prominent experts for students.

Part -VII

**DAIMSR Sustainability
Initiatives**

The Institute performs no activities that contribute to emissions in environment. We envision that the managers graduating from the Institute are groomed into responsible citizens of nation with social, ethical, and environmental sensitivity.
